

Joint Centers of Excellence Program (JCEP)

Academic Researcher
Riyadh, Saudi Arabia
Research and Development

The Joint Centers of Excellence Program (JCEP) at King Abdulaziz City for Science and Technology (KACST) includes several centers in collaboration with world-renowned academic and industry partners. JCEP is offering research positions in Riyadh for highly talented Saudi Arabian nationals holding Bachelors, Masters, or PhD degrees in multiple disciplines such as: applied mathematics, physics, statistics, computer science, operations research, biology, genetics, chemistry and material science as well as various engineering disciplines such as electrical, mechanical, chemical, civil, petroleum, aerospace and systems.

The Research positions fall under the Advanced Training Program (ATP) which is a two-year capacity building program conducted by the joint Centers of Excellence Program (JCEP). The Advanced Training Program targets top Saudi students interested in pursuing advanced studies for their Masters and PhD degrees. The ATP is designed to provide various skills necessary to strengthen the researchers profile and enhance their chances of acceptance at world renowned universities. ATP has been a resounding success with researchers completing the program being admitted to top tier universities such as MIT, Harvard, Berkeley, Stanford, Michigan, Oxford, and Toronto. JCEP researchers are expected to travel and spend time at the partnering entity. Researchers will receive full KACST employee salaries and benefits and are entitled to scholarships for Masters, PhD, or Postdoctoral studies if they are granted acceptance into an accredited university.

Minimum Qualifications

- Hold a Bachelors, Masters or PhD in a relevant major.
- High GPA [> 4/5 or equivalent]
- Fluent in English
- Saudi National
